This "short" text book of Paediatrics which runs into nearly 800 pages on its 10<sup>th</sup> Silver Jubilee edition provides information on almost all comprehensive and broad range topics in paediatric diseases including neonatology and surgical paediatrics. It also incorporates national and International recommendations of MCI, IAP, NNF, WHO, UNICEF, IPA, ISTP, AAP etc. Besides it is well referenced and there is an useful list of paediatric web sites. Dr Gupte's contribution to each and every topic bespeaks of his personality. As an energetic medical writer as he is, he has authored many books on paediatrics. The book is presented in a colourful way which pleases the reader's eyes. There are numerous photographs, radiographs and drawings nicely blended with the text. The book seems to be quite popular amongst medical students ,as the silver jubilee edition has proved it.
